

YOUNG PEOPLE WITH AUTISM

DEVELOPING AN INCLUSIVE SCHOOL ENVIRONMENT TO SUPPORT EMOTIONAL REGULATION AND RESILIENCE

Students with autism experience significantly more challenges than their typically developing peers. Only 23% of pupils with Autism Spectrum Condition (ASC) achieved 5 or more A*-C grades (including English and Maths) at GCSE, compared to 54% among all students in the same year, and exclusion rates (often due to provision that doesn't match need) are also significantly higher.

This course will look at the impact that a positive and inclusive school environment can have on emotional regulation for students with autism. Understanding of potential pressure points during the day: looking at the full school day and where the potential difficulties may lie and considering transitions, both in school and at home. We will also examine how an inclusive school can address these pressure points, providing a unique research and evidence-based approach to practical solutions.

COURSE OUTLINE

- Session 1** Mainstreaming Autism – from research to practice; making it work in the school context
- Session 2** Starting to think about emotional regulation – what does it mean & what can you do?
(inc. Visual Supports and practical ideas)
- Session 3** Successful Partnerships are key for success! – both in the classroom and with parents/carers
- Session 4** Supporting the Use of Language in Accessing the Curriculum
Considering individual settings, personal action plans and research ideas

Friday
9th Dec 2016,
Cardiff
